Mississippi Beef Cattle Improvement Association

2016 Fall Bull and Heifer Sale

Thursday, November 10, 2016
12:00 Noon
Hinds Community College
Raymond, MS

MISSISSIPPI STATE UNIVERSITY™
EXTENSION

Dear Cattle Producers:

The Mississippi Beef Cattle Improvement Association is pleased to offer outstanding performance backed bulls in our fall sale. We are also excited to about this year's offering of bred commercial heifers and registered open heifers. Time and time again our cattle buyers cite the breed leading genetics, environmental adaptability, freight, and customer service advantages of purchasing cattle raised in Mississippi. Cattle in this sale offer these advantages and more.

A selection assistance tool is available once again this year to help potential buyers select bulls that best fit their herd sire needs. Bulls meeting certain EPD requirements are labeled as Calving Ease, Terminal, Balanced Trait, and Carcass Merit in this catalog and on their pen signs at the sale. Look for these designations when planning your bull purchases.

The sale will be broadcast live from the Raymond sale site over the Extension distance education system. A link to the sale site will be available at extension.msstate.edu/beef.

The cattle will be available for viewing at the Hinds Community College Sales Facility in Raymond, MS starting on the afternoon of November 10. BCIA members, breeders, and Extension personnel will be glad to assist you in selecting breeding cattle that will work well for your operation. We look forward to seeing you at the sale on November 10.

Sincerely,

Brandi B. Karisch

Extension Beef Cattle Specialist

Terms, Conditions, and General Sale Information

TERMS: Terms of the sale are cash. Settlements are to be made with the clerk immediately after the conclusion of the auction. The Mississippi Beef Cattle Improvement Association acts as an agent only. The contract is between the buyer and seller.

BIDDING & DISPUTES: All cattle will be sold at public auction to the highest bidder. The auctioneer will settle any disputes concerning bids, and auctioneer decisions will be final. *Auctioneer: Jarvene Shackelford - American Livestock Brokers: H: (662) 837-4904 | Mobile: (662) 837-1776*

HEALTH: Health papers from licensed veterinarians accompany cattle to the sale. It is the responsibility of the buyer to know the health restrictions of his/her state and be aware of the possibility of any subsequent testing of animals purchased through this sale as required by law.

REGISTRATION: All bulls have been registered with their respective breed associations. Properly signed certificate of registry transfers will be furnished to the buyer.

BREEDING GUARANTEE: Animals are guaranteed to be without defects, but nothing more.

Bulls: All sale bulls will have documentation of a passed breeding soundness exam, including scrotal measurements within 30 days prior to sale. Scrotal circumference measurement minimums for sale bulls are 32 cm for 12–16 month old bulls, 34 cm for 17–23 month old bulls, and 36 cm for 24+ month old bulls. Bulls failing to breed after a trial of six months may be returned to the seller, if in good condition. The seller reserves the right to try said animal for six months, and if he proves to be a breeder, to return him to the buyer at the buyer's expense. If the bull proves to be a non-breeder, a satisfactory exchange will be made or purchase price refunded.

Bred Heifers: A pregnancy examination has been performed prior to the sale. Due dates reported in sale catalog are approximate based on a 283-day gestation. The consignor guarantees bred heifers to be safe in calf at the time of sale. If a heifer is proven by veterinary exam within 30 days after sale to be open, the consignor will replace the heifer or make a financial settlement with the buyer.

Settlement is between buyer and seller. In the event of an open heifer, the buyer must: 1) contact the consignor directly; 2) procure a signed statement of fact from a licensed veterinarian; 3) reach an agreement with the consignor as to the settlement procedure; and 4) contact sale management if a satisfactory settlement is not reached.

Open Heifers: "Open" females are guaranteed by the seller to be without calf.

ANNOUNCEMENTS: Announcements made from the auction block on sale day shall take precedence over information printed in the catalog. It is therefore the buyer's responsibility to pay attention to any such announcements.

PROCESSING FOR SALE: Cattle are to be delivered to the sale location by 12:00 noon on November 9, 2016 (the day preceding the sale). Cattle will be weighed, beginning at 1:00 p.m. that day and available for viewing afterwards.

SALE ORDER: Bulls will sell before heifers. A committee of three will set the bull sale order based on individual performance data, EPDs, general conformation and quality. A selection index based on the individual bull's score in the following categories will be used to rank bulls for determination of sale order (highest scoring will sell first); CE or BW EPD (max of 5 points), WW EPD (max. of 7.5 points), YW EPD (max. of 7.5 points), scrotal circumference (max. of 5 points), weight per day of age (max. of 15 points), IMF EPD (max of 5 points), REA EPD (max of 5 points), and visual appraisal (max. of 40 points). Five points will be added to a bull's selection index total if ultrasound scan results are provided.

CATTLE REMOVAL: Cattle purchased will be cared for 24 hours after the conclusion of the sale without charge. Arrangements for removal from grounds must be made at the conclusion of the 24 hours.

LIABILITY: All persons who attend this sale do so at their own risk. The owners and sponsors assume no responsibility, legal or otherwise, for any accidents that may occur.

Explanation of Performance Records

Bull Designations

Bulls meeting certain expected progeny difference (EPD) requirements are noted with one or more of the following designations:

- **Balanced Trait:** *should provide moderation for calving ease, growth, and milking ability*
- **Terminal:** *should produce calves with exceptional growth performance*
- **Calving Ease:** *should reduce the risk of calving difficulty in females to which a bull is bred*
- **Carcass Merit:** *should produce calves with good post-weaning growth, ribeye area, and marbling*

Individual Bull Performance Records

<i>BW</i>	<i>Adj. WW</i>	<i>WW Ratio</i>	<i>Adj. YW</i>	<i>YW Ratio</i>	<i>Adj. IMF</i>	<i>IMF Ratio</i>	<i>Adj. REA</i>	<i>REA Ratio</i>
1	2	3	4	5	6	7	8	9

1. **Birth Weight** – Actual birth weight.
2. **Adjusted Weaning Weight** – Weaning weight adjusted to 205 days of age.
3. **Adjusted Weaning Weight Ratio** – Bull's weaning weight as compared to his contemporary group. Average = 100.
4. **Adjusted Yearling Weight** – Yearling weight adjusted to 365 days of age.
5. **Adjusted Yearling Weight Ratio** – Bull's yearling weight as compared to his contemporary group. Average = 100.
6. **Adjusted Intramuscular Fat** – Percent intramuscular fat of the ribeye adjusted to 12 months of age.
7. **Adjusted Intramuscular Fat Ratio** – Bull's adjusted percent intramuscular fat as compared to his contemporary group. Average = 100.
8. **Adjusted Ribeye Area** – Area of the ribeye in square inches adjusted to 12 months of age.
9. **Adjusted Ribeye Area Ratio** – Bull's adjusted ribeye area as compared to his contemporary group. Average = 100.

Expected Progeny Differences

Expected progeny differences are a useful genetic selection tool. They provide predictions of the expected performance of the calves sired by a bull compared to the expected performance of calves sired by other bulls of the same breed. They are calculated as part of national cattle evaluation programs and are based on the performance records of an individual animal, its relatives, and its progeny. Most breed associations publish EPDs on individual animals in sire summaries and searchable Internet databases. Breed associations also publish tables that show where individual animals rank within the breed for specific traits.

Expected progeny differences can be used to make herd genetic improvement in both commercial and seedstock operations. They should be used in conjunction with other selection criteria in a balanced approach to select herd sires with acceptable combinations of economically relevant traits that will complement cow herds and match market targets. Genetic improvement can mean increased weaning weights and growth performance, enhanced reproductive performance and better performance on the rail, all of which can enhance the profitability of a cattle operation. **Printed EPD values are accurate as of 10/1/2016.**

Accuracy Values (ACC)

Expected progeny differences come with **accuracy values (ACC)** that give an indication of the reliability of the EPDs. Accuracy values help breeders determine the level of uncertainty or risk associated with selection

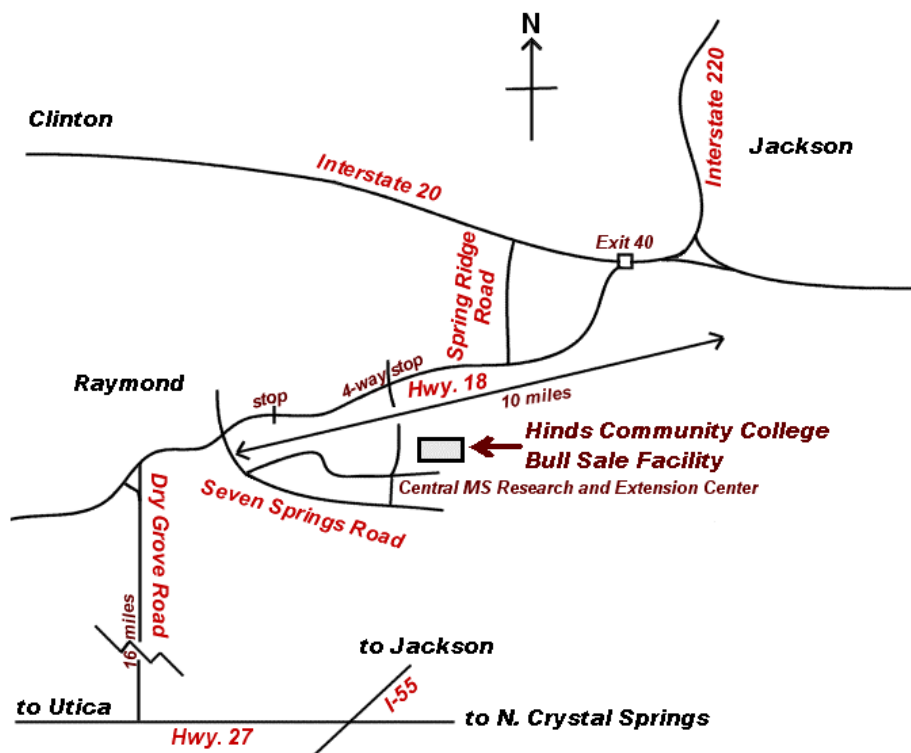

decisions. They are reported as a decimal number between zero and one. Larger values indicate greater accuracy. Remember, EPDs can be directly compared regardless of accuracy. Accuracies simply reflect risk.

Expected change tables are published by breed associations as part of national cattle evaluations to show how much variation can be expected for EPDs at specific accuracy levels. As more usable performance information becomes available for an animal and its relatives and progeny, the more accurate or reliable its EPDs become. Thus, a young, unproven bull with no calves will have lower accuracy EPDs than a proven sire with hundreds of calf records.

These bred heifers were genetics verified through AngusSource[®] (Lot ID: MS10 972046).

Replacement Female Value \$W (Weaned Calf Value), is a genetic index value expressed in dollars per head, associated with preweaning performance in a cow-calf operation, including both revenue and cost adjustments associated with calving ease, weaning direct growth, maternal milk and mature cow size.

Feeder Carcass Value \$B (Beef Value), is a genetic index value expressed in dollars per head, associated with postweaning gain performance in the feedlot, combined with the value differences in carcass merit.

Replacement Female Value
Avg. Sire \$W: \$42.33
% Rank: 55

Feeder Carcass Value
Avg. Sire \$B: \$91.81
% Rank: 65
