Hinds Community College Bull Test
Mississippi Beef Cattle Improvement Association

2017 Spring Bull Sale

Thursday, March 2, 2017 • 12:00 Noon
Hinds Community College
1310 Seven Springs Road, Raymond, MS

**MISSISSIPPI STATE UNIVERSITY™
EXTENSION**

Dear Cattle Producers:

The Hinds Community College Bull Test and Mississippi Beef Cattle Improvement Association cattle marketing partnership is a proven source for breeding cattle that build profits. In today's cattle market, the payoffs from using quality herd sires make acquiring high quality genetics a must for producers.

We recognize that quality bulls are essential to producing profitable calf crops. Time and time again our bull buyers cite the breed leading genetics, environmental adaptability, freight, and customer service advantages of purchasing bulls raised in Mississippi. All bulls in our spring sale are screened for structure, disposition, and performance and are guaranteed as breeders. These bulls have passed breeding soundness examinations, met minimum growth and scrotal circumference requirements, and represent quality genetics.

As an added attraction, the Mississippi BCIA will host its annual membership meeting at the sale site starting at 6:00 p.m. on Wednesday, March 1, 2017. Dow AgroSciences will sponsor the meal and provide the educational program. Attendees will also have an opportunity to view the sale cattle. The supper and program are open to the public. Please RSVP to Mari Quinn at 662-325-3516 or m.quinn@msstate.edu if you plan to attend the Wednesday evening activities.

Hinds Bull Test personnel, BCIA members, breeders, and Extension personnel will be glad to assist you in selecting herd sires that will work well for your operation. We look forward to seeing you at the sale on March 2.

Sincerely,

Kenny Baner

Hinds Bull Test Manager

Terms, Conditions, and General Sale Information

TERMS: Terms of the sale are cash. Settlements are to be made with the clerk immediately after the conclusion of the auction. The Hinds Community College Bull Test and Mississippi Beef Cattle Improvement Association act as an agent only. The contract is between the buyer and seller.

BIDDING & DISPUTES: All cattle will be sold at public auction to the highest bidder. The auctioneer will settle any disputes concerning bids, and auctioneer decisions will be final.

Auctioneer: Jarvene Shackelford - American Livestock Brokers: H: (662) 837-4904 | Mobile: (662) 837-1776

HEALTH: Health papers from licensed veterinarians accompany cattle to the sale. Health papers will be reissued by a licensed veterinarian at the sale. It is the responsibility of the buyer to know the health restrictions of his/her state and to be aware of the possibility of any subsequent testing of any animals purchased through this sale as required by law.

REGISTRATION: All sale bulls are registered with their respective breed associations. Properly signed certificate of registry transfers will be furnished to the buyers.

BREEDING GUARANTEE: Animals are guaranteed to be without defects, but nothing more.

Bulls: All sale bulls will have documentation of a passed breeding soundness exam, including scrotal measurements within 30 days prior to sale. Scrotal circumference measurement minimums for MBCIA sale bulls are 32 cm for 12–16 month old bulls, 34 cm for 17–23 month old bulls, and 36 cm for 24+ month old bulls. Bulls failing to breed after a trial of six months may be returned to the seller, if in good condition. The seller reserves the right to try said animal for six months, and if he proves to be a breeder, to return him to the buyer at the buyer's expense. If the bull proves to be a non-breeder, a

satisfactory exchange will be made or purchase price refunded.

ANNOUNCEMENTS: Announcements made from the auction block on sale day shall take precedence over information printed in the catalog. It is therefore the buyer's responsibility to pay attention to any such announcements.

PROCESSING FOR SALE: MBCIA cattle are to be delivered to the sale location by 12:00 noon on March 1, 2016 (the day preceding the sale). MBCIA bulls will be weighed, beginning at 1:00 p.m. that day and all cattle will be available for viewing afterwards.

SALE ORDER: Hinds Bull Test bulls will sell first based on an index $(2 \times \text{WDA Ratio} + 1 \times \text{ADG})/3$. Mississippi BCIA bulls will sell immediately following the Hinds Bull Test bulls. The MBCIA index based on the individual bull's score in the following categories will be used to rank bulls for determination of sale order (highest scoring will sell first); CE or BW EPD (max. 5 points), WW EPD (max. 7.5 points), YW EPD (max. 7.5 points), actual scrotal circumference (max. 5 points), WDA (max 15 points), IMF EPD (max. 7.5 points), REA EPD (max. 7.5 points), and visual appraisal (max. 40 points). An additional 5 points will be added to a bull's selection index total if ultrasound body composition scan results are provided.

CATTLE REMOVAL: Cattle purchased will be cared for 24 hours after the conclusion of the sale without charge. Arrangements for removal from grounds must be made by the end of the 24 hours.

LIABILITY: All persons who attend this sale do so at their own risk. The owners and sponsors assume no responsibility, legal or otherwise, for any accidents that may occur.

- 1. Birth Weight** – Actual birth weight.
- 2. Adjusted Weaning Weight** – Weaning weight adjusted to 205 days of age.
- 3. Adjusted Weaning Weight Ratio** – Bull's weaning weight as compared to his contemporary group. Average = 100.
- 4. Adjusted Yearling Weight** – Yearling weight adjusted to 365 days of age.
- 5. Adjusted Yearling Weight Ratio** – Bull's yearling weight as compared to his contemporary group. Average =100.
- 6. Bull Test Weight Per Day of Age** – Final bull test weight divided by bull age in days.
- 7. Bull Test Weight Per Day of Age Ratio** – Bull's weight per day of age at bull test end as compared to his contemporary group. Average =100.
- 8. Bull Test Average Daily Gain** – Average daily gain in pounds per day over the 112-day bull test period.
- 9. Bull Test Average Daily Gain Ratio** – Bull's test average daily gain as compared to his contemporary group. Average =100.
- 10. Adjusted Intramuscular Fat** – Percent intramuscular fat of the ribeye adjusted to 12 months of age.
- 11. Adjusted Intramuscular Fat Ratio** – Bull's adjusted percent intramuscular fat as compared to his contemporary group. Average = 100.
- 12. Adjusted Ribeye Area** – Area of the ribeye in square inches adjusted to 12 months of age.
- 13. Adjusted Ribeye Area Ratio** – Bull's adjusted ribeye area as compared to his contemporary group. Average = 100.

Mississippi BCIA Bull Designations

Bulls meeting certain expected progeny difference (EPD) requirements are noted with one or more of the following designations:

- **Balanced Trait:** should provide moderation for calving ease, growth, and milking ability
- **Terminal:** should produce calves with exceptional growth performance
- **Calving Ease:** should reduce the risk of calving difficulty in females to which a bull is bred
- **Carcass Merit:** should produce calves with good post-weaning growth, ribeye area, and marbling

Expected Progeny Differences

Expected progeny differences are a useful genetic selection tool. They provide predictions of the expected performance of the calves sired by a bull compared to the expected performance of calves sired by other bulls of the same breed. They are calculated as part of national cattle evaluation programs and are based on the performance records of an individual animal, its relatives, and its progeny. Most breed associations publish EPDs on individual animals in sire summaries and searchable Internet databases. Breed associations also publish tables that show where individual animals rank within the breed for specific traits.

Expected progeny differences can be used to make herd genetic improvement in both commercial and seedstock operations. They should be used in conjunction with other selection criteria in a balanced approach to select herd sires with acceptable combinations of economically relevant traits that will complement cow herds and match market targets. Genetic improvement can mean increased weaning weights and growth performance, enhanced reproductive performance and better performance on the rail, all of which can enhance the profitability of a cattle operation. **Printed EPD values are accurate as of 2/1/2017.**

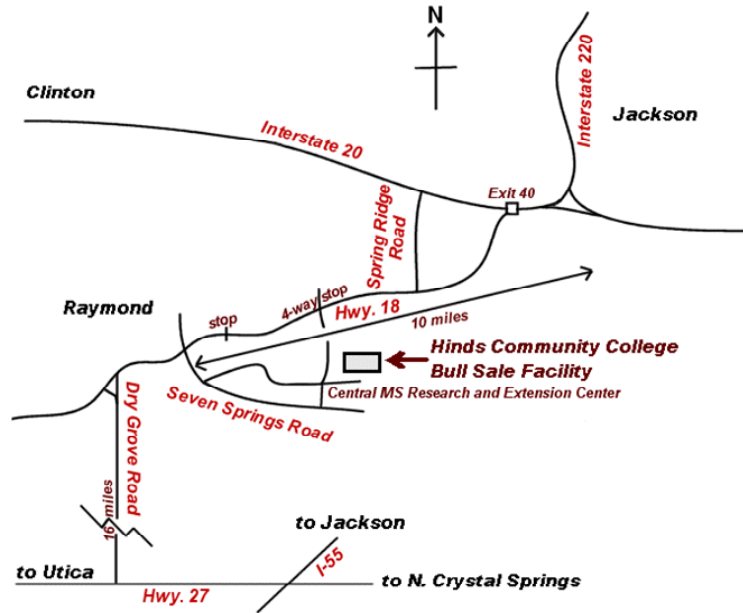

Accuracy Values

Expected progeny differences come with **accuracy values (ACC)** that give an indication of the reliability of the EPDs. Accuracy values help breeders determine the level of uncertainty or risk associated with selection decisions. They are reported as a decimal number between zero and one. Larger values indicate greater accuracy. As more usable performance information becomes available for an animal and its relatives and progeny, the more accurate or reliable its EPDs become. A young, unproven bull with no calves will have lower accuracy EPDs than a proven sire with hundreds of calf records. Regardless of accuracy, EPDs can be directly compared amongst cattle of the same breed.
