Progeny #CHAD	Early	Low	Very Short	No

*Variety maturity is rated specifically for the Delta region relative to other varieties. Later maturing varieties are more likely to avoid spring freeze damage so are generally better suited to northernmost regions, particularly if wheat is planted early in the fall. Early maturing varieties are best suited for relatively late planting dates.

Varieties Adapted for North Mississippi

Early maturing varieties are best suited for relatively late planting dates.

Varieties Adapted for South Mississippi

Variety	Maturity*	Straw Strength	Height	Awned Heads
Progeny #CHAD	Med-Early	Low	Very Short	No
Progeny #TURBO	Medium	Med-High	Medium	No
Progeny #BINGO	Very Late	Medium	Med-Tall	Yes

Delta Grow 1200	Very Late	High	Med-Tall	Yes
Go Wheat 6000	Early	Low	Medium	Yes
AgriMAXX 535	Late	High	Medium	Yes

*Variety maturity is rated specifically for South Mississippi relative to other varieties. Earlier maturing varieties are generally best suited for southernmost areas. Later maturing varieties generally have marginal adaptation in southern regions and may not yield well, or fail to meet vernalization needs (cold temperatures) to stimulate reproductive development, particularly if wheat is planted late.
