

NEEDLESTICK PREVENTION

OUCH!

ON THE FARM

Needlestick injuries are usually minor, but they can be serious.

Most common injuries

- Skin infections
- Allergic reactions
- Deep tissue wounds that require surgery

Don't Get Stuck

- Slow down - don't rush with injections
- Restrain animals properly
 - » Get help from coworkers
 - » Use the correct equipment and techniques
- Don't recap needles
- No needles/syringes in your pockets
- Don't hold caps in your mouth
- Discard bent or dull needles
- Use approved sharps containers

Did You Know?

- Over 80% of farm workers vaccinating animals have accidentally stuck themselves.
- Vaccines are the most common type of drug involved in needlestick injuries.

Got Stuck?

- Wash the skin with soap and water immediately
- Report injury to your supervisor
- Call your healthcare provider

Be Careful

Especially with these Products

Tilmicosin (Micotil®)
Sedatives (e.g., Xylazine)
Oil-based products or vaccines
Brucella abortus Strain RB51 vaccine
Modified live vaccines (e.g. Erysipelas vaccine)
Johne's vaccine
Hormones - especially if pregnant
Antibiotics - especially if allergic
