

**DID YOU
KNOW?**

Skin cancer is the most common type of cancer in the United States. Individuals with lighter-toned skin are more susceptible to UV damage, but people of all races and ethnicities are at risk for skin cancer.

**THE
GOOD
NEWS IS**

You can prevent skin cancer by using sunscreen with 30 SPF or higher. Also, talk to your health-care provider about your skin health and ask for a thorough skin exam with your annual wellness exam.

**MISSISSIPPI STATE UNIVERSITY™
EXTENSION**

SKIN CANCER
