Terral TV8861	Med-Late	Medium	Short	Med-High	Yes	Good
USG 3251	Med-Late	High	Medium	Med-High	Yes	Good
Syngenta SY Harrison	Medium	Med-High	Med-Tall	Med-Low	Yes	Fair
Terral TV8848	Med-Late	Medium	Med-Tall	Medium	Yes	Good

**Variety maturity is rated specifically for the Delta region relative to other varieties. Later maturing varieties are more likely to avoid freeze-damage and thus are generally better suited to northernmost regions, particularly if wheat is planted early. Early-maturing varieties are best suited for relatively late planting dates.*

Varieties Adapted for North Mississippi

Variety	Maturity*	Straw Strength	Height	Test Wt	Awned Variety	Metribuzin Tolerance
Pioneer 26R10	Med-Late	Med-High	Med-Tall	Med-Low	Yes	Good

Pioneer 26R87	Med-Early	Med-High	Medium	High	Yes	Fair
AGS 2035	Early	High	Med-Tall	High	Yes	Fair

***Variety maturity is rated specifically for South Mississippi relative to other varieties. Earlier-maturing varieties, such as Terral LA754, USG 3120, Pioneer 26R87, and AGS 2035 are generally best suited for southernmost areas. Later-maturing varieties generally have marginal adaptation south of Highway 84 and may not yield well, or may fail to meet vernalization requirements (cold temperatures) to stimulate head production, particularly when planting late.*
