28th Annual Mississippi
Greenhouse Tomato Short Course

If you are a grower of greenhouse tomatoes, or if you have interest in growing this crop, mark your calendar now for the 28th Annual Greenhouse Tomato Short Course. Participating in this program will be the best way to learn all about successfully producing greenhouse tomatoes.

The Greenhouse Tomato Short Course will be held at the Eagle Ridge Conference Center, 1500 Raymond Lake Road, Raymond, MS. Expert speakers will present seminars on March 6 and 7 (Tuesday and Wednesday), all top notch in their respective fields.

Special topics this year will be components of the greenhouse system, greenhouses design and engineering, growers' experiences and perspectives, marketing, budget for greenhouse growers, updates on the latest research, plant nutrition, grafting, alternative crops, and of course the very popular pest management workshop, which will include physiological disorders, diagnosing plant problems, plant disease identification and control, and insect pest management. Also, this year will we have a greenhouse tour!

Exhibitors from across the U.S. and Canada will be available to show you their products and discuss how to use them. All aspects of production will be thoroughly covered. Plan on attending this Short Course to learn all you need to know about this crop and run a successful greenhouse business. In recent years, the Short Course attracted participants from more than 20 states and several Caribbean and Latin American countries.

The Greenhouse Tomato Short Course continues to be the best deal around! Compare this program to others that cost over $500 to register. Advance registration is $200, or, if you prefer, you can pay $225 at the door, per person for the entire Short Course. For advance registration, you can pay with a credit card online (website below).

I would like to encourage advance registration so that the number of meals can be estimated accurately. Advance registration must be received by February 20.

The registration fee includes coffee, refreshments, lunch both days, the greenhouse tour, and all Extension publications. All those who preregister will also receive the latest edition of the Greenhouse Tomato Short Course cap.

See the web site, for complete details on the Greenhouse Tomato Short Course – www.greenhousetomatosc.com. For further information, send email to Dr. Rick Snyder at Rick.Snyder@msstate.edu or call (601) 892-3731.
